## HOW TO DETERMINE YOUR RING SIZE

## HOW TO MEASURE A RING

1. Select a ring that properly fits the intended finger.
2. Measure the inside diameter of the ring considering two opposite points.
3. Once obtained the measure compare it on the size chart.

MEASUREMENTS MATCH THE
INSIDE EDGE OF THE RING

## TIPS FOR MEASURING

Your ring should fit your finger comfortably; snug enough so that it will not fall off, but loose enough to slide over your knuckle

Finger size changes depending on the time of the day and the weather. For best results measure your finger size:

1. At the end of the day and when your fingers are warm. (Fingers are smaller in the early morning and when cold)
2. Measure finger size 3 to 4 times to eliminate an erroneous reading.

Avoid using strings or paper to measure ring size as these materials can stretch or twist, yielding an inaccurate measurment.
